From the Desk of EDITOR

I am please to publish this issue. I am thankful to all contributors and authors for submitting their Articles and Papers. However it was not possible to incorporate all the papers and Articles because some of them were not found to be matching our standard and form. It is my suggestions to the authors that you must read “guidelines for the Authors” before sending you papers. This will minimize the rejection rate.

Once again contributors are requested to prepare your papers for the next coming issues.

With best wishes.
